Dear Sir: Re: Stefano Magaddino - JHR; am

At your request, I have received the report on Mr. Stephano Magaddino, as submitted by Dr. Eugene Lippschutz dated March 31, 1970. I apologize for the delay but I have been out of the country and have just returned. Parenthetically, I had a meeting with Dr. Lippschutz on the morning of March 6, 1970, at my office in New York City in order to clarify the procedures to be employed in the examination of Mr. Magaddino.

Based on the clinical evidence obtained by Dr. Lippschutz under controlled and objective conditions, I must agree that the diagnosis is severe coronary artery disease, with evidence of significant heart muscle damage and frequent and severe episodes of acute coronary insufficiency (cardiac pain). The latter are always life-threatening. I must conclude, therefore, with Dr. Lippschutz that it would be hazardous to his life if Mr. Magaddino were subjected to the stress of a court trial.

Sincerely yours,

Howard G. Bruenn
